Collision Report

Simplify road traffic collision reporting for the public

Collision Report provides an easy online platform for the public to report road accidents directly to the police. It captures all necessary information, streamlines the review process, and reduces the need for police involvement, saving time and resources.

Why Police Constabularies use Collision Report

Helping the public report minor road traffic collisions to the police through cost effective and efficient ways. Helps reduce frontline demand and achieveS efficiency savings.

Deliver faster and efficient service to public.

Fully paperless, cloud-based solution.

Quicker assessment of road collisions.

Free up frontline demand and divert officers to other duties.

Reduce police time, fuel and travel costs.

All data securely stored in UK data centre.

"There have been force-wide efficiencies recognised as a result of the software implementation, streamlining operations, reducing administrative burdens, and improving data-sharing across departments. This has enabled officers to focus more on frontline policing, leading to faster response times and more effective crime prevention."

Inspector Jon Malcolm, Specialist Operations Unit, Cleveland & Durham Police
