Onsite Alert

Easily identify vehicles associated with crime through ANPR

Utilising a database of vehicles associated with criminal activity, the **Onsite Alert** software scans registration plates in real time and sends out an alert when a match is made.

Why Private Security firms use Onsite Alert

Enabling private security firms to safeguard their clients through instant vehicle alerts when scanned via ANPR systems.

LATEST VEHICLES

Vehicle Reg: BF67 KAR
Type: Citroen Black
Location: Harrogate
Date: 10-03-24

Vehicle Reg: RN17 AFL
Type: VW Golf Red
Location: Northampton
Date: 09-09-24

- Receive alerts in real time when a vehicle is matched.
- Search for vehicles associated with criminal behaviour.
- Know instantly when a vehicle enters a location.
- Integrates with existing ANPR systems.
- View vehicle crime history and details of occupants.
- Track vehicle offending across SentrySIS network.

SWL security

"I have been engaged with Sentrysis for several years now and I find their approach to be innovative and client first approach. The Sentrysis crime reporting platform is simply the best in the market today with real outcomes of crime processing and resolution on a community level. It's making a real change for the better on our high streets."

Mark Ferns, Managing Director, SWL Security
