# OnsiteAlert

Find wanted vehicles faster. Using a database of vehicles associated with a crime, the OnsiteAlert software scans in real time and sends out an alert when a match is made. UK police forces, private security companies, BCRPs and their members, can find out where and when the vehicle has been spotted and track it straight away.

- ⚡ Automatically search for vehicles associated with crime
- ⚡ Know when a vehicle enters a location
- ⚡ View vehicle crime history details
- ⚡ View in real time
- ⚡ Integrate with existing ANPR systems
- ⚡ Track vehicle locations and profiles
- ⚡ Identify common vehicle travel routes

Get immediate alerts about any vehicle on site in real time. Track locations and profiles.

"The system is so user friendly and with the functions it has available has been pivotal in the part our organisation plays in preventing crime here in the North East"

Lee Steabler, NERCP Manager
